

WAREMA Colour World

Maximum colour selection

Der SonnenLichtManager

The WAREMA Colour World

Available for all powder-coated aluminium parts

Colour deviations are due to printing technology

Choose the perfect shade from over 200 attractive powder colours for the powder-coated aluminium parts such as guide rails, cover panels, profiles or boxes. The clearly arranged categories Highlight, Variation and Individual optimise your process of consultation and help to find the right colour for the individual sun shading system quickly and easily.

Categories

Highlight

12 RAL and DB basic colours form the foundation of the WAREMA Colour World. We offer you selected standard colours, which satisfy all of the latest colour trends.

Variation

Make use of this opportunity to vary your design with a further 50 RAL basic colours and four surfaces. Any special colour concept can be realised.

Individual

Over 200 additional colours complete the WAREMA Colour World and offer greater individuality. This means no wishes are left unfulfilled.

The displayed colours from the Highlight category form the basis of the WAREMA Colour World. The extended colour selection for the Variation and Individual categories can be found on the following page.

Surface qualities

The various surfaces along with the comprehensive colour selection offer you the perfect opportunity to realise the individual wishes of customers. Choose from five surface qualities in order to perfectly optically adapt the gloss level and texture to the corresponding structural condition. The exceptional coating quality ensures longevity - independently tested by the German Quality Association for the Coating of Building Materials (GSB). The surface coating with chrome-free pretreatment is compliant with the directive GSB AL 631.

You can find more information at www.warema.com

Satin finish

Satin finish is a slightly glossy surface with a smooth finish and optimal light and weather resistance.

Matt

A matt surface is distinguished by its smooth matt finish and optimal light and weather resistance.

Fine texture

The fine text surface quality has striking effects and optimum light and weather resistance of the surface.

Highly weather-resistant matt and fine texture

The highly weather-resistant surfaces in matt or fine texture are characterised by significantly improved weathering behaviour with regard to gloss retention, weathering, chalking and colour stability.
